ABOUT ME

I got my first computer at the age of 8 years (C64) and stepped into the internet at the age of 13. Since then I tested a whole lot of creative multimedial tech things. In the year of 2019 I started a vocational training as software developer that I've finished in 2021. During several years working as a product photographer I have sharpened my eyes for design and visual things by editing graphics and photos.

The processes and structures of eCommerce were part of my daily workflow for about 15 years.
